

Mastering Developer Tools

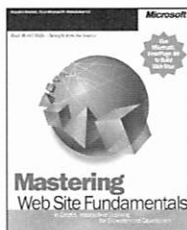

OVERVIEW

Mastering Series training products are straight-from-the-source training designed to help you build your expertise in creating custom solutions using Microsoft developer tools and technologies. Mastering titles provide professional-level, self-paced, interactive, multimedia CD-ROM courses. Each Mastering Series title delivers more than 40 hours of training on CD-ROM and is designed to teach developers how to create custom business solutions using Microsoft® Visual Studio™ development system products.

Fundamentals

- Mastering Microsoft Visual Basic® Fundamentals
- Mastering MFC Fundamentals Using Microsoft Visual C++®
- Mastering Web Site Fundamentals

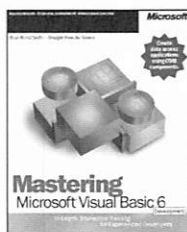

Mastering Fundamental courses are designed for professional developers who need to learn a new development environment or language. The primary objective is to introduce concepts of the new development tool and prepare users to take the intermediate application development courses.

Development

- Mastering Office 97 Development
- Mastering Web Application Development Using Visual InterDev™ 6
- Mastering MFC Development Using Microsoft Visual C++ 6
- Mastering Microsoft Visual Basic 6 Development

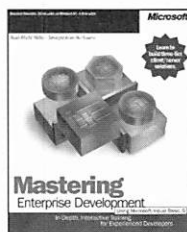

Mastering Development intermediate courses are focused on helping professional developers expand their breadth of skill using a specific Microsoft development tool. Courses cover building single-user, local-machine desktop applications and mastering typical on-the-job dilemmas.

Enterprise

- Mastering Enterprise Development Using Microsoft Visual Basic 6
- Watch for more Enterprise Development titles from Microsoft

Advanced Mastering Enterprise development courses are designed for enterprise-level developers creating multi-tier, distributed applications. Users will learn how to integrate a variety of development tools and technologies into their Web, client, or client/server business applications. Enterprise-level mastering titles provide developers with the tools needed to master custom-solution business application development.
